

**PRELIMINARY AMENDMENT**  
**U.S. APP. NO. 09/445,769**

01  
51 (b) receiving a predetermined signal that indicates changes in the operation states of the server devices from the server devices by the client device and displaying the change in the operation state of a specific server device on a screen thereof.

---

02  
21 6. (Amended) A method for a server device to communicate with a client device in a network where various digital devices connected to the network operate as the client or as servers, the method comprising the steps of:  
transmitting a re-determined signal for indicating changes in the operation states of the server device to the client device when the server device performs a predetermined operation and stops the operation or performs another operation.
